

Locally Grown Art Studio offers a variety of classes for your unique interests. Our Classes range from beginner to advanced with many specialty workshops in between. We limit our classes to 3 students so that each student receives focused instruction and their own workspace. We also concentrate on developing basic skills and providing a solid technical foundation so that you leave with the knowledge to set up a home studio or rent time through our studio. Students create multiple glass art pieces using high quality materials and have access to different types of equipment to work hot and cold glass. To learn more about our educational opportunities, click on the class listings button below. Thank you for your interest and we look forward to meeting you.
